

Opportunity to unlock the potential to invest in Mpumalanga

WHY INVEST IN MPUMALANGA?

With a commitment to continued growth and accelerated investment into new areas of economic development, the Place of the Rising Sun – South Africa’s Mpumalanga province – is in business mode. While the Mpumalanga province offers modern infrastructure and innovative technology in South Africa, new strategies aim to grow the economy of one of the country’s most picturesque provinces.

For this to happen, investment is critical. Mpumalanga, through its economic growth agency MEGA, is spearheading several economic projects to contribute to the economic growth and development of the province.

ABOUT MEGA

MEGA’s primary mandate is to foster the sustainable growth and development of Mpumalanga’s economy through its operational activities of Trade and Investment Promotion, Development Funding, Equity Investments, and Property Management and Development. The Agency remains accountable to the Mpumalanga Department of Economic Development and Tourism (DEDT). MEGA is the foreign investor’s or trader’s first point of contact for doing successful business in the Mpumalanga province. Through the Trade and Investment Promotion Division, the Agency provides a variety of services to potential investors and trading partners.

Mpumalanga’s position and resources make it a valuable transport and logistics hub. The adage “location, location,

location” holds when it comes to companies seeking to invest in Mpumalanga. A well-positioned property can create an immediate sense of value and potential for investors, thus MEGA Property Development and Management Division specialises in providing potential investors with a very large existing property portfolio consisting of the following properties: Small Industrial Parks, Industrial Parks, and Residential properties/Agricultural lands throughout the Mpumalanga province.

MEGA is in the process of refurbishing the properties and is inviting investors interested in property development to form strategic partners. By leveraging these MEGA assets, companies can showcase their investment potential by leasing any of our properties for business growth and cementing their position as MEGA partners in the refurbishment or development of industrial properties.
